Garden Master's Message

Hello everyone,

I've returned as OVF Garden Master. I continue to meet with members and hear interesting things about OVF. During my conversations at the garden, I recently learned of two people doing tasks at OVF that were unknown to me. One is a member who has been watering plants with drip irrigation during the same thing today. I have been very enlightened by these events. My topic today is OVF community tours. OVF has its employees – all volunteers. Each of them has their own tasks, and I think that each of the employees is trying to contribute to the overall care and upkeep of the garden.

Over time there has developed at OVF a rather complex array of workgroups, special projects and calendared and uncalendared maintenance tasks. Here is a brief description of each of these facets.

1. Work at calendared tasks with no pre-approval required (just show up):
   - Workdays - second Saturday and last Sunday of the month
   - Tuesdays - every Tuesday morning, and
   - Composting - every Saturday morning.

2. Work at calendared times but pre-approval needed (contact the group lead beforehand):
   - Compost composting - every Tuesday morning , and OVF Curators - every Sunday afternoon.

3. Yearly calendared tasks that members join us to do (some time generally coalesced for several volunteers to accomplish all of these options):
   - Workday Supervisor (2 hour tours),
   - Pruning (2 hour tours),
   - Gate cleaning (1 hour tours),
   - Trash can liner activation (2 hours),
   - Mulching,
   - T-Shirt crew, and
   - Workday bulletin board poster install.

4. Work where the Group Lead just posts the dates:
   - Beautification (process described on OVF website)
   - Plant propagation,
   - Pot washing,
   - Orchard group,
   - Greenhouse Project Monitor assistance,
   - Recycling,
   - Plant Sale Preparation,
   - Newsletter,
   - Plant identification, and
   - Garden design projects.

5. Repair crews (work done by a crew member when the need arises):
   - Water and Plug repair,
   - Wheelbarrow repair,
   - Irrigation repair, and
   - Electrical repair.

It's important to note that many of the listed jobs have been filled by members who have come to OVF to do a job, and then have stayed on to do other projects or categories. But OVF is a dynamic and ever-evolving garden. If you're interested in a specific task, let me know. If you have a task that you'd like to do, we would improve the puzzle and fill in the hole, let me know that too.

Finally, OVF relies on these few members who have stepped up to take on leadership roles in the work groups and operations that keep OVF functioning. The above list is extended to the general member-looking to participate in the garden. Below is a list of the leaders who are involved in the management positions of much of the work and operations of the garden. The seven members of the OVF Board. OVF and its membership owe them a debt of gratitude for their work. Also, I'd like to thank Jeff Hall for his recommendation and help so much of that time he was a member of the OVF. So I end this message with a thank you to some of those leaders; Jeff Hall, Jeff Wells, Jeff Kelly, Mark Clark, Mark McNeal, Nina Steele and Thomas. OVF is indeed in their debt.

Jim

Jim Hamill
OVF Garden Master

President's Message

The last month, I've been pleased to represent OVF at numerous garden events events. Here's a round-up:

LAUSD: OVF shared a booth at the faculty fair of gardens with over 100 students from the local Mar Vista Elementary School. The docents and volunteers at the booth were very impressed with the students' level of conversation. They enjoyed being hands on and mostly we found ourselves from a third grader was "I am definitely coming here on my birthday." Please consider volunteering for this event next year. It's a great opportunity for you if you have something to taste or interesting to share from your yard for next time.

Mar Vista Artist Colo: This local club of over 50 members is dedicated to the care and planting of trees in our neighborhood, and the promotion of the arts. They have been a great friend to OVF over the years. Each year, they host the Mar Vista Artist Colo and organizers and volunteers of the club hold the parkways on the southside of Venice at Centinela. Next up, together we are planning a Mar Vista Artist Colo event at OVF and hope to have a booth to share our vision and resources with.

Venetians Pepper: On June 1, OVF's Native Plant Club was pleased to participate in the Venetians Pepper Festival at Venice High School. Native Plants is a non-profit organization founded in 1986 to promote the appreciation and conservation of California native plants. Our booth raised the awareness and growth of our organization and our garden. Thanks to all who helped with this event. We are so happy to have support and our members and volunteers. Please see the upcoming events and how you can for the various events that OVF hosts.

Altadena Community Garden: This community garden, with 2.5 acres, is one of the largest in the Los Angeles area. Located in the foothills of the San Gabriel Mountains, it is home to community plots and gardens that showcase the greatest soil remediation project I have ever seen. I visited and joined in on a tour of the garden with Jim Hamill, Garden Master of OVF, and a few fellow members. Impressive. Unique. Inspiring. Over the course of over 100 feet long, the berm will catch run off and collect contaminants in the soil. Above the berm are gardens and plots that are raised beds filled with clean soil and mulch. The berms will grow in flower and foliage over time and are decorated, having collected the contaminants from the soil. The project was funded by a grant from the EPA and is a model for other projects in other locations, professors and friends. What a great education and experience!

Thanks for reading.
Shirley Vernaglia
OVF President

OVF Calendar

(All events are held at the main OVF meeting area unless otherwise stated.)

July 6, 10am - Garden Master available to chat at PT's, Joe Mill
July 9, 1pm - OVF Native Plant Club meeting in Seattle
July 10, 11am-2pm - Hours opportunity: clerical work at OVF office (may to work?@gmail.com)
July 10, 6pm - Garden Master Zoom office hour (may to vofgms@gmail.com)
July 12, 10am-2pm - Hours opportunity: clerical work at OVF office (may to work?@gmail.com)
July 16, 2pm - Garden Master available to chat at PT's, Joe Mill
July 17, 10am-2pm - Hours opportunity: clerical work at OVF
July 20 and 21, 10am-2pm - Hours opportunity: clerical work at OVF office (may to work?@gmail.com)

Upcoming Events at OVF

Work Days
Saturday-Sept 13rm
-July 13
-Sunday- 7-April
-July 27

General Meeting
August 9
1:00 pm
(Pot Luck at 12:30)

Board Meeting
July 19
9:30 am

Full Calendar

Workgroup Profile

All About Gourmet Composting

The first thing to know about gourmet compost is that it really isn't compost but, rather, one of the ingredients to go into gourmet compost. Jackson and I have been composting at OVF for about 15 years. We've learned a lot by trial and error and by reading Jeff Hampton's, who founded the group, Better Composting Methods, book. Jeff's methods are simple and require little effort. Jeff's efforts – turn and also be used on its own to retain soil moisture and deter weeds. Jeff's methods are simple and require little effort. Jeff's methods are simple and require little effort. Jeff's methods are simple and require little effort

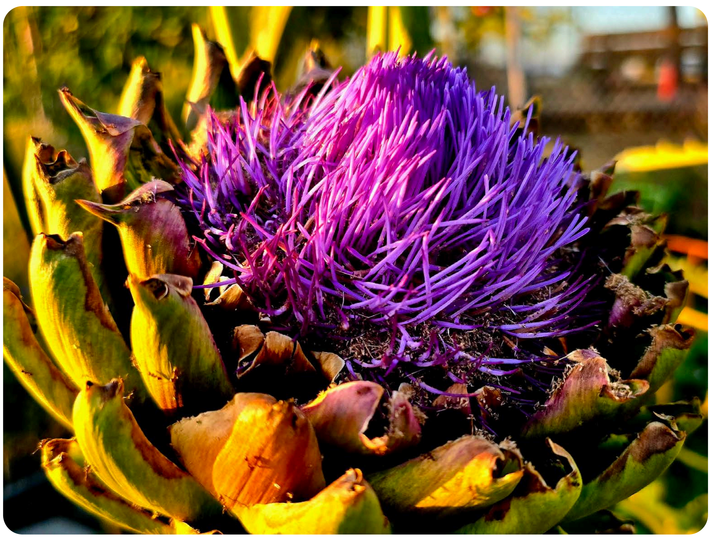
At this stage almost all the feeding was done by the female, who brought insects regularly. I thought the male had abandoned the nest, but when a squirrel came too close, the female's alarm cries brought the male out of hiding and the two birds drove the squirrel away. As the chicks matured and the time for them to leave the nest approached, both parents worked furiously, bringing insects every few minutes.

It was remarkable how quickly they could find insects - one more testament to organic gardening! By the end of May, the chicks had grown large and more bold.

Fledging - leaving the nest - normally happens about three weeks after hatching. And when I arrived on June 3rd, it was immediately apparent that something had changed. There was no feeding frenzy. I rapped on the box. There was no response. I lowered the box and opened it. It was empty. The chicks had fledged.

Where are they now? Have they made it to independent adulthood? Or have they perished to one of the many perils they face: hawks, crows, outdoor cats, or traffic. When you consider that a pair of bluebirds may produce dozens of offspring in their lifetimes yet only two must reach adulthood to sustain a stable population, you realize that most fledglings don't make it.

But the Western Bluebird, our local species, is doing well, thanks in large part to the efforts of the many people who make, install, and monitor nest boxes. And here's good news: the OVF bluebirds have already started a second brood, laying four eggs with an expected hatch date of about July 4th. If all goes well, expect to see adults frequently bringing food to the chicks in the box's new location in an olive tree near Gate #1.



Member Feedback / Submissions

If you have any feedback or comments on the newsletter, please contact the OVF Education Chair Debra Kaufman at ovfdeb@gmail.com.

Land Acknowledgement

Ocean View Farms recognizes that we garden on land originally and currently inhabited by the Chumash, Kizh, Tongva, and Serrano peoples. We respect them as the first caretakers of this land, with gratitude for their wisdom and skills.
